Canadian Capabilities Guide

Government to Government Acquisition

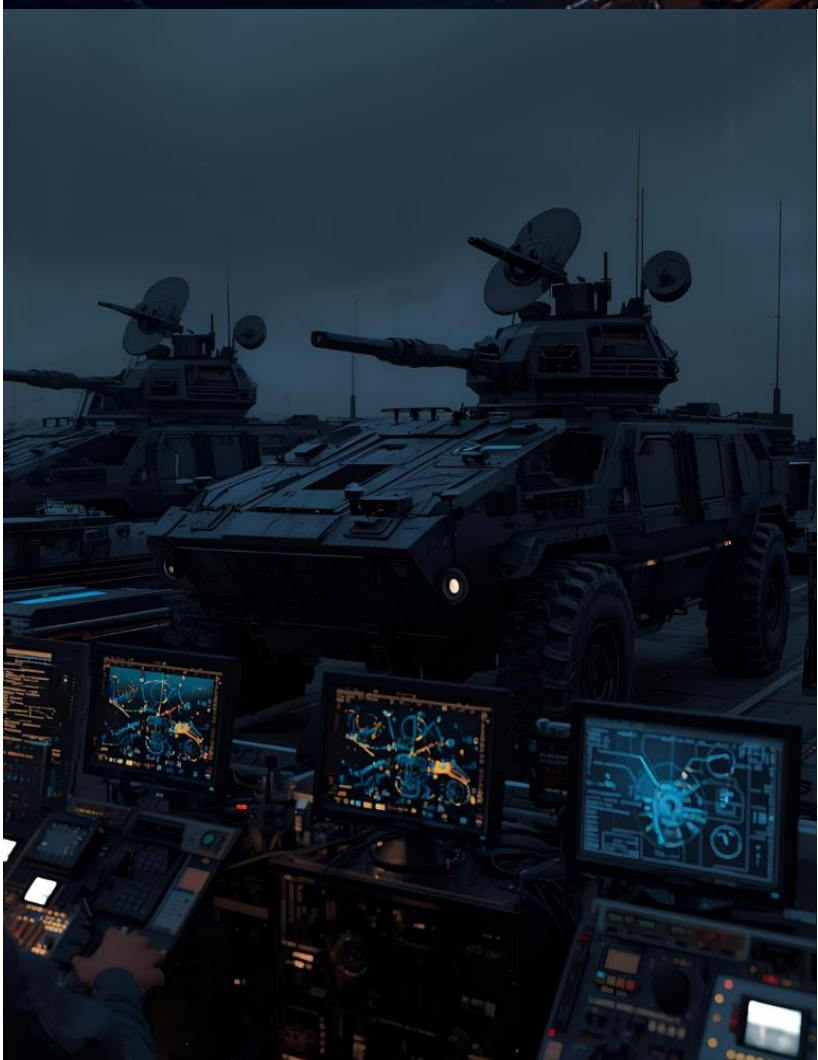

CANdefend

CCC | Canada

CCC is Canada's government to government (G2G) contracting agency.

To help foreign government buyers meet their complex and critical procurement needs, CCC offers a proven government to government service to purchase solutions from Canada.

De-risk the procurement process

We remove contract performance risk with our proven G2G contracting model, vendor due diligence, and government guarantee of contract performance.

Faster and better procurement

We satisfy priority needs with unsolicited proposals from qualified Canadian suppliers. We welcome value for money assessments on our proposals.

Attract sources of financing

We bring a proven track record of successfully delivered public sector projects and a network of commercial banks to attract project financing.

Building our shared bilateral relationship

Each G2G contract is an opportunity to deepen our trade relationship and builds meaningful ties between our governments.

Aircraft Manufacturing & Assembly

Bell Textron Canada

Products: CH-146 Griffon, Bell 412EPX, Bell 429, Bell V-280, Helicopter Emergency Medical Services (HEMS), Public Safety Platforms

Capabilities: Bell Textron Canada Ltd. is a key player in Canada's aerospace industry, specializing in advanced rotary-wing platforms for defense, emergency response, and public safety. It supports the Royal Canadian Air Force's largest helicopter fleet and is modernizing the CH-146 Griffon under the GLLE program. Bell's tiltrotor and medium-lift helicopters offer superior speed, range, and versatility for tactical missions and disaster relief. The company also provides in-service support through 14 Canadian facilities and maintains a strong national supply chain.

bellflight.com

Headquarters and Locations Across Canada: Mirabel, QC (HQ) and facilities in NFLD, NS, QC, ON, AB, BC.

Bombardier Defense

Products: Challenger and Global aircraft, engineering and touch labour expertise for aircraft flight test, modification, integration, and certification, maintenance services.

Capabilities: Bombardier Defense is a proven partner of choice for governments around the world, providing next-generation aircraft and solutions. Hundreds of Bombardier aircraft support critical airborne missions, including Intelligence, Surveillance and Reconnaissance (ISR), Airborne Early Warning & Control (AEW&C), border and maritime patrol, multi-role, head of state transport, medevac and urgent humanitarian assistance.

defense.bombardier.com

Headquarters and Locations Across Canada: Montreal, QC (HQ); Toronto, ON; Peterborough, ON; Saint Laurent, QC.

De Havilland Canada

Products: Dash 8-400, Canadair 515, Twin Otter Classic 300-G, SD3-60 Sherpa, Legacy Aircraft

Capabilities: De Havilland Canada is a global leader in utility-built aircraft for aerospace, defense and special missions. With nearly 100 years of aerospace innovation, the company delivers rugged, reliable platforms for aerial firefighting, search and rescue, medical evacuation, reconnaissance, and coastal surveillance. Its aircraft are supported by a global network and are trusted by military and government operators worldwide, including recent deliveries to the United States Air Force for the Guatemala Air Force. De Havilland's engineering and avionics upgrade programs ensure mission readiness and operational excellence in the most demanding environments.

dehavilland.com

Headquarters and Locations Across Canada: Calgary, AB (HQ); Mississauga, ON; Toronto, ON.

Field Aerospace

Products: Special mission aircraft mods & overhauls: maritime patrol, surveillance, SAR, medevac, avionics.

Capabilities: With modified surveillance aircraft in use by governments in Canada, Sweden, Iceland, Australia, Japan, Denmark, and the USA, Field Aerospace has a global reputation for design, engineering, integration, and delivery of aircraft and systems used in maritime domain awareness and national sovereignty protection. They provide end-to-end solutions for government, defence, and air support organizations requiring cost-efficient, reliable airborne platforms.

fieldaero.com

Headquarters and Locations Across Canada: Mississauga, ON (HQ); Calgary, AB.

PAL Aerospace

Products: Design engineering, C4ISR software, operations, in-service support, training solutions.

Capabilities: PAL Aerospace delivers end-to-end airborne special missions for government clients, including COCO ISR (Force Multiplier), marine surveillance (DFO), in-service support (FWSAR CC-295), and fixed-wing air ambulance operations. They support government agencies tackling today's complex safety, environmental, economic, and security threats with proven, mission-ready aviation solutions.

palaerospace.com

Headquarters and Locations Across Canada: St. John's, NL (HQ) and Various locations in Canada (NL, NS, QC, ON, BC).

Wildcat Helicopters

Products: Helicopter Support Services, Helicopter Fire Fighting Services, Helicopter Disaster Relief services, Helicopter Search and Rescue Services, Helicopter Hoist / Rescue Services, Helicopter Heavy Lift services, Helicopter Construction Services, Helicopter Military Support Services, Helicopter Medivac / Casevac services, Helicopter Transportation Services.

Capabilities: Wildcat Helicopters provides domestic and international helicopter services, specializing in aerial firefighting and Class D external load operations. With over 20 years of global experience—including in the U.S. and Australia—Wildcat excels in aircraft logistics and transportation via ground, sea, and air. The company is U.N. certified and authorized for both VFR and IFR operations. Its fleet includes intermediate, medium, and heavy lift helicopters with lift capacities up to 28,000 lbs (12,700 kg), featuring models such as the Airbus H125, Bell 212/412 variants, and Boeing Vertol 107-II and 234 (Chinook).

wildcathelicopters.com

Headquarters: West Kelowna, BC.

Aircraft Systems & Components

CEL Aerospace

Products: Auxiliary Power Units; Calibration Services; Computer Equipment/Software Systems; Contract Design & Manufacturing; Contract Engineering & Technical Personnel; Contract R & D; Engine Test Cells; Engineering; Software Design & Development; Support Services; Systems Integration; Test Rigs & Equipment; Turbofan Engines; Turboprop Engines; Turboshaft Engines

Capabilities: CEL is a world leader in test equipment for aircraft engines; turboprops, turboshafts, turbofans/Jets, as well as APUs; with over 1,500 projects delivered in more than 25 countries and 36 years of experience in support of the engine OEMs, MRO and Military. CEL offers upgrades and turnkey test equipment including engine test cells (fixed, mobile and multi-engine), Data Acquisition and Control Systems and specialized R&D facilities including Compressor and Altitude test cells. CEL's extensive global support network offers calibration and maintenance services.

cel-aerospace.com

Headquarters: Saint-Hubert, QC.

Honeywell Aerospace

Products: Avionics, navigation systems, flight management systems, auxiliary power units (APUs), propulsion technologies, environmental control systems, wheels and brakes, fuel systems, actuation systems, aircraft connectivity solutions.

Capabilities: Honeywell Aerospace develops and manufactures advanced aircraft systems that improve safety, efficiency, connectivity and operational performance. Its technologies are integrated on commercial, military and special mission aircraft worldwide, supporting flight operations, navigation, propulsion, power generation and mission-critical aircraft functions.

honeywellaerospace.com

Headquarters and Locations Across Canada: Calgary, AB (HQ); Mississauga, ON; Cambridge, ON; Sommerset, PEI.

MDS Aero

Products: Test solutions for gas turbine engines.

Capabilities: MDS Aero offers cutting-edge capabilities in advanced engine test solutions and engineering services. They lead on gas turbine engine testing industry with innovative turnkey solutions, advanced test systems, and data acquisition technologies for Aviation, Industrial and Military applications. Trusted by OEMs and MROs, MDS delivers expertise in engineering design, facility construction, instrumentation, and digital systems.

mdsaero.com

Headquarters and Locations Across Canada: Ottawa, ON (HQ), Thompson, MB.

Maintenance, Repair, and Overhaul (MRO)

IMP Aerospace & Defence (Cascade)

Products: C-130 Hercules Support, Component Repair, Fleet Sustainment, Engineering & Maintenance Services.

Capabilities: Cascade Aerospace, a unit of IMP Aerospace & Defence, is a leading Canadian provider of engineering, maintenance, and fleet sustainment services for military and government aircraft. With deep expertise in supporting mixed fleets, Cascade specializes in C-130 Hercules programs and offers scalable solutions to meet operational and budgetary demands. Headquartered in Abbotsford, BC, with facilities in Trenton and Ottawa, Cascade supports domestic and international clients with mission-ready capabilities.

cascadeaerospace.com

Headquarters and Locations Across Canada: Abbotsford, BC (HQ); Ottawa, ON; Trenton, ON.

Honeywell Aerospace

Products: Component repair and overhaul services, avionics support, asset management solutions, spare parts support, predictive maintenance tools, lifecycle sustainment services.

Capabilities: Honeywell Aerospace provides comprehensive aftermarket support and sustainment services that help operators maximize aircraft availability, reduce lifecycle costs and maintain mission readiness. Its global support network delivers repair, logistics, technical support and modernization solutions for commercial and defence fleets.

honeywellaerospace.com

Headquarters and Locations Across Canada: Calgary, AB (HQ); Mississauga, ON; Cambridge, ON; Sommerset, PEI.

MHD Rockland

Products: C-130 Hercules, P-3 Orion, Aircraft Parts & Spares, MRO Services, Supply Chain Logistics.

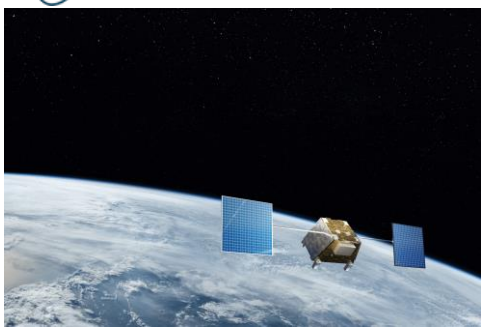

Capabilities: MHD Rockland is a global leader in aftermarket support for fixed-wing legacy military aircraft, including the C-130 and P-3 platforms. With over 350,000 stocked parts and a global distribution network, MHD Rockland provides mission-critical spares, repair services, and sustainment solutions. The company operates in Canada, the U.S., Australia, and New Zealand, and is a Lockheed Martin authorized distributor.

mhdrockland.com

Headquarters and Locations Across Canada: Sainte-Anne-de-Bellevue, QC (HQ); Burlington, ON.

Space Systems

EarthDaily

Products: EarthDaily Constellation, Retina Mission Management, Geospatial Intelligence, Predictive Risk Analytics.

Capabilities: EarthDaily Federal delivers near real-time geospatial intelligence for defense, national security, and humanitarian missions. Its upcoming EarthDaily Constellation will provide daily global imaging with AI-ready analytics, enabling rapid threat detection, ISR operations, and proactive risk management. EarthDaily's platforms support defense-grade security, mission-critical decision-making, and open-source intelligence integration for GEOINT and OSINT communities.

earthdaily.com

Headquarters and Locations Across Canada: Vancouver, BC (HQ); Toronto, ON.

Honeywell Aerospace

Products: Space avionics, onboard computers, vehicle management systems, optical communication systems, scientific instruments, optical imagers, guidance and attitude control systems, space situational awareness technologies.

Capabilities: Honeywell Aerospace designs, manufactures and tests mission-critical technologies for civil, commercial and defence space programs. Its Canadian operations provide expertise in space instrumentation, spacecraft electronics, optical communications, Earth observation and space-domain awareness solutions that support some of the world's most demanding space missions.

honeywellaerospace.com

Headquarters and Locations Across Canada: Calgary, AB (HQ); Mississauga, ON; Cambridge, ON; Sommerset, PEI.

MDA Space

Products: Communications satellites, Earth and space observation, and space exploration and infrastructure.

Capabilities: With a 55-year+ record of firsts and 450+ missions, MDA Space is a trusted space mission partner to the rapidly expanding global space industry. Spanning communications satellites, Earth and space observation, and space exploration and infrastructure, Its expertise and innovations support defence, intelligence, and security operations worldwide — enabling some of the most ambitious missions today and making possible their customers' bold visions for tomorrow.

mda.space

Headquarters and Locations Across Canada: Brampton, ON (HQ); Ottawa, ON; Montreal, QC; Halifax, NS; Richmond, BC

Telesat

Products: Telesat Lightspeed, a satellite network designed to provide high-speed, low-latency, fiber-like connection to users worldwide.

Capabilities: Telesat Lightspeed National LEO is a secure, sovereign solution tailored for governments. It offers full operational control, in-country infrastructure, and advanced cybersecurity. With real-time programmability and mission-specific customization, it ensures private, resilient, and autonomous communications for national priorities.

telesat.com

Headquarters and Locations Across Canada: Ottawa, ON (HQ) and various locations in Canada (NU, QC, AB, ON)

Defence Platforms & Land Systems

Land Platforms

GDLS Canada

GENERAL DYNAMICS
Land Systems–Canada

Products: LAV 6.0, Armoured Combat Support Vehicles (ACSV), Logistics Vehicle Modernization (LVM) Program, Amphibious and Land Combat Platforms.

Capabilities: GDLS-Canada is a strategic defense partner and leading provider of land and amphibious combat vehicle solutions.

With nearly 50 years of experience, GDLS-C designs, manufactures, and supports advanced armoured platforms tailored to meet the evolving needs of the Canadian Armed Forces and allied militaries. Its portfolio includes the LAV 6.0 family, ACSV variants, and the LVM program, delivering next-generation logistics and combat support capabilities.

GDLS-C integrates robotics, AI, cyber resilience, and hybrid-electric technologies to ensure mission readiness, interoperability, and survivability in modern conflict environments. The company also leads initiatives in Indigenous economic reconciliation and maintains a robust Canadian supply chain to reinforce sovereign defense capacity.

gdls.com

Headquarters and Locations Across Canada: London, ON (HQ); Ottawa, ON; Gatineau, QC.

INKAS

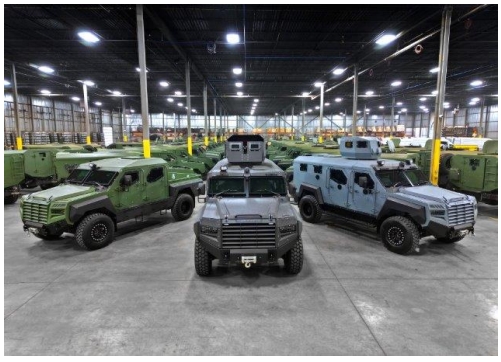

Products: INKAS® Defense specializes in armored vehicles, UAS and counter-UAS systems, border security, integrated surveillance, and advanced training.

Capabilities: Led by former military and law enforcement professionals, INKAS® delivers mission-ready solutions that enhance mobility, threat detection, and operational effectiveness for government, defence, and public safety agencies. Its flagship solutions include FPV Bomber Drones for remote strikes, the Hudson Recon ARV for multipurpose tactical operations, the Geebor MRAP for mine and IED protection, the HEEMAR UGV for fire support, logistics, and casualty evacuation, and the Sentry APC for secure personnel transport in high-risk zones.

inkasdefense.com

Headquarters: Toronto, ON.

Roshel

Products: Light, Medium, and Heavy Armoured Vehicles including the Senator Family, Counter Drone Vehicles, and Medical Evacuation Platforms

Capabilities: Roshel designs and manufactures advanced armoured vehicles entirely in Canada. Its products are fielded by NATO allies and government agencies for defense, public security, border protection, and emergency response. With vertically integrated production and full in-service support, Roshel delivers scalable and mission-ready solutions for high-risk environments.

roshel.com

Headquarters: Brampton, ON.

Zeal Motor

Products: FAT TRUCK® family of ultra-light, extreme-terrain, amphibious off-road vehicles including 8×8 Cargo, 8×8 Personnel Carrier, Hauler, and Search & Rescue variants; Arctic-configured mobility platforms

Capabilities: Zeal Motor Inc. is a Canadian manufacturer of high-mobility land platforms purpose-built for operations in the world's most challenging environments, including Arctic, sub-Arctic, swamp, muskeg, snow, ice, and littoral terrain. Through its dedicated FAT TRUCK® DEFENSE division, Zeal Motor delivers mission-ready vehicles that support defence, security, and sovereignty operations requiring exceptional terrain access, low environmental impact, and high operational reliability.

fattruck.com

Headquarters: Cowansville, QC

Naval Platforms

Davie

Products: Complex ice and warship design, manufacturing, conversion, repair and operation.

Capabilities: Davie is a global leader in Icebreaker design and construction, illustrated with the largest Icebreaker orderbook in the NSS. It is the first in the industry for converting a commercial vessel into a NATO compliant Naval Auxiliary, that is owned and operated on behalf of DND to support the RCN and Allied navies. Additionally, Warship ISS and refitting across North America and Northern Europe.

davie.ca

Headquarters and Locations Across Canada: Lévis, QC (HQ); Montreal, QC; Ottawa, ON.

Seaspan

Products: Multi-Purpose Icebreakers, Naval Corvettes, icebreaker, science and naval vessel design, construction, and repair

Capabilities: Seaspan designs and builds complex icebreakers, science, and naval vessels, including the world's largest and most powerful heavy icebreakers and Canada's largest navy ships. Its Multi-Purpose Icebreaker design, a highly versatile Arctic/Antarctic asset, has programs totaling 22 ships with Canada and an allied nation. Its two repair shipyards are among North America's most capable Pacific coast MRO yards.

seaspan.com

Headquarters and Locations Across Canada: North Vancouver, BC (HQ); Victoria, BC; Ottawa, ON.

Autonomous Vehicles

Cellula Robotics

Products: GUARDIAN XLAUV, with ultra-long range mission endurance, has the ability to remain deployed for weeks at a time. GUARDIAN can deploy and recover off-platform assets for inspection and interaction with objects that may present a threat.

Capabilities: Cellula Robotics Limited transforms subsea survey, science, and security with modular, autonomous platforms enhancing key defence areas: undersea infrastructure, seabed and surface ISR, anti-submarine warfare, battlespace prep, maritime awareness, mine countermeasures, and port security. Their interoperable systems protect critical linear assets like pipes and cables in high-traffic or contested zones.

cellula.com

Headquarters and Locations Across Canada: Burnaby, BC (HQ); Dartmouth, NS

Volatus Aerospace

Products: RPAS/UAS operations, BVLOS drone services, aerial intelligence and ISR solutions, geospatial mapping and LiDAR services, EO/IR sensor integration, drone training and certification, counter-UAS solutions, remote inspection and monitoring services.

Capabilities: Volatus Aerospace is a Canadian leader in integrated drone aviation and aerial intelligence solutions. The company delivers advanced remotely piloted aircraft systems (RPAS), beyond visual line of sight (BVLOS) operations, intelligence, surveillance and reconnaissance (ISR), and geospatial data services for defence, public safety, critical infrastructure, and government customers.

volatusaerospace.com

Headquarters and Locations Across Canada: Oro-Medonte, ON

C4ISR, Sensors & Electronics

Anvil

Products: ANVIL Platform - C5ISR decision support, AI-enabled

Capabilities: ANVIL is a Canadian defence technology company that links intelligence, operations, and planning through an AI-enabled platform designed for national security and defence organizations. The ANVIL platform supports the full C5ISR mission set, ingesting and structuring mission-critical data, enriching it with AI, and presenting a single actionable picture that accelerates decision-making at every echelon. Anvil delivers data-driven decision advantage to military and national security organizations.

anvil.ai

Headquarters: Ottawa, ON.

CGI

Products: secure cloud and data management, enterprise command-and-control and decision-support systems, C4ISR information systems, AI-enabled analytics.

Capabilities: CGI specializes in delivering secure, interoperable, and resilient digital defence architectures, including enterprise-level C2 and C4ISR information systems, ISR data processing and fusion environments, and secure collaboration platforms used in both peacetime and deployed operations. Its expertise spans cybersecurity, secure hosting and cloud services, systems engineering, and long-term managed services, enabling defence clients to protect sensitive data, ensure continuity of operations, and accelerate decision-making in multi-domain environments.

cgi.com

Headquarters and Locations Across Canada: Montreal, QC (HQ), Ottawa, ON, Toronto, ON, Halifax, NS.

CMC Electronics

Products: Avionics Computers, Displays and Control Panels, Navigation Systems, Cockpit Systems Integration, Optoelectronics, Cockpit 4000 NexGen Avionics Suite

Capabilities: CMC Electronics designs advanced avionics systems for ISR and light attack aircraft. Its TacView Plus portable mission display and Cockpit 4000 suite provide real-time situational awareness, threat detection, and secure data processing. These systems are deployed across military platforms for airborne ISR missions.

cmcelectronics.ca

Headquarters and Locations Across Canada: Montreal, QC (HQ); Ottawa, ON.

D-TA Systems

Products: EMSO solutions including OTHR, SIGINT systems, EW threat emulation, and RF spectrum record/playback.

Capabilities: D-TA delivers end-to-end EMSO capabilities for government and defense organizations, including long-range surveillance, SIGINT collection, EW testing and training, RF spectrum recording and analysis, and threat emulation. These support intelligence gathering, spectrum dominance, force readiness, system validation, and operational decision-making across land, sea, air, and unmanned platforms.

[d-ta.com](d-ta.com)

Headquarters: Ottawa, ON

Evertz Microsystems Ltd.

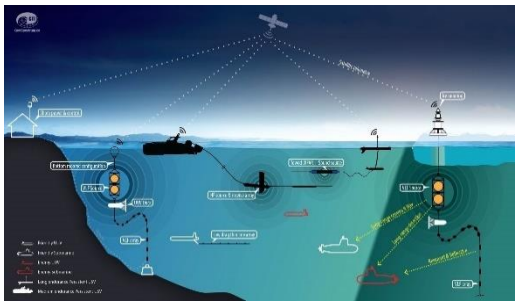

Products: Situational awareness tech for ISR, C2, SATCOM, and secure media in mission-critical environments.

Capabilities: Evertz designs and manufactures situational awareness technology for defense and government operations. Its ultra-low latency solutions support real-time ISR, C2, SATCOM, and secure media transport. Built for complex environments, their systems ensure 24/7/365 mission-critical performance with continuous tactical communication, signal management, and operational visibility.

evertz.com

Headquarters: Burlington, ON

GeoSpectrum Technologies

Products: Towed Reelable Active Passive Sonar, Persistent Surveillance System, Very Low Frequency Sound Source, Hull-Mounted Sonars, Acoustic Transducers, Particle Motion Sensors.

Capabilities: GeoSpectrum Technologies offers persistent maritime ISR through its Lilypad platform, a customizable uncrewed surveillance system. Lilypad integrates sonar, radar, AIS, EO/IR, and electronic warfare sensors to provide continuous coastal monitoring and threat detection. It supports homeland security and naval operations with low-maintenance, scalable ISR capabilities.

geospectrum.ca

Headquarters and Locations Across Canada: Dartmouth, NS (HQ); Ottawa, ON.

GSCI

Products: Night vision systems; thermal imaging systems; EO/IR fusion devices; fire-control systems; laser rangefinders; laser aiming devices and target designators; helmet-mounted and weapon-mounted electro-optical systems.

Capabilities: GSCI is Canada's leading designer and manufacturer of professional-grade electro-optical and photonics systems for defence, security, and public safety applications. Since 1992, the company has delivered mission-ready night vision, thermal imaging, and multi-sensor fusion solutions that enhance situational awareness, target acquisition, and precision engagement in degraded visual environments.

gsci.net

Headquarters: Woodbridge, ON

Lockheed Martin Canada

Products: CMS 330 is a tested, fielded, exported and in-service next generation Combat Management System.

Capabilities: CMS 330 is a scalable combat management system designed for NATO and international maritime operations. It integrates ship sensors, systems, and weapons to enhance situational awareness and enable rapid, informed decision-making. By connecting people and technology, CMS 330 supports missions ranging from naval combat and allied interoperability to peacekeeping, humanitarian aid, counterpiracy, law enforcement, and scientific research—delivering precise offensive and defensive effects in dynamic environments.

lockheedmartin.com/en-ca

Headquarters and Locations Across Canada: Ottawa, ON (HQ); Halifax, NS; Montréal, QC; Victoria, BC; Calgary, AB

L3Harris WESCAM

Products: WESCAM MX™ Series, which includes multi-sensor, multi-spectral electro-optical/infrared (EO/IR) imaging and targeting systems.

Capabilities: L3Harris WESCAM, headquartered in Ontario, manufactures the MX-Series EO/IR turrets used in airborne, land, and maritime ISR missions. Its MX-10D and MX-20D systems offer multi-sensor imaging, laser designation, and advanced image processing, supporting tactical surveillance, reconnaissance, and precision targeting.

l3harris.com/wescam

Headquarters and Locations Across Canada: Hamilton, ON (HQ); Ottawa, ON; Toronto, ON; Montreal, QC; Moose Jaw, SK; Calgary, AB; Burnaby, BC; Victoria, BC; Fredericton, NB; Halifax, NS;

Network Innovations

Products: Secure SATCOM solutions; multi-orbit satellite connectivity (LEO, MEO, GEO); deployable and mobile communications kits; C4ISR network integration; managed network services; 24/7 network operations; secure voice, data, and video communications.

Capabilities: Network Innovations is a Canadian provider of secure, mission-critical communications solutions for defence, government, and national security customers. Specializing in SATCOM-enabled C4ISR, the company designs, integrates, and operates resilient communications architectures supporting command and control, ISR data transport, and mission assurance across air, land, maritime, and remote environments.

networkinnovations.com

Headquarters: Burnaby, BC

OSI Maritime

Products: Advanced NATO-approved systems for C2/C4ISR, navigation, situational awareness, and mission systems for all vessels.

Capabilities: OSI Maritime Systems has delivered advanced integrated navigation and tactical solutions to military customers for over 20 years. A pioneer in WECDIS, OSI provides bridge systems for warships, navigation for submarines, and C2 systems for small craft. With 26 naval clients, over 700 vessels operate OSI's leading maritime solutions worldwide.

osimaritime.com

Headquarters: Burnaby, BC

PAL Aerospace

Products: Force Multiplier Program, AIMS-ISR & AIMS-C4, Special Mission System Integration, Mwari Aircraft ISR Integration, Manufactured ISR Components.

Capabilities: PAL Aerospace delivers end-to-end airborne special missions for government clients, including COCO ISR (Force Multiplier), marine surveillance (DFO), in-service support (FWSAR CC-295), and fixed-wing air ambulance operations. They support government agencies tackling today's complex safety, environmental, economic, and security threats with proven, mission-ready aviation solutions. PAL is the first Canadian provider to deliver next-gen SATCOM-enabled ISR platforms with real-time mission collaboration.

palaerospace.com

Headquarters and Locations Across Canada: St John's, NFLD (HQ); Halifax, NS; Ottawa, ON; Vaugh, ON; St-Laurent, QC; Winnipeg, MB; Vancouver Island, BC;

Ultra Electronics (Ultra I&C)

Products: Orion Tactical Radios (X500, X650), Archer Troposcatter System, Cyber Encryption & Key Management Systems, COMSEC Accounting, Reporting & Distribution System (CARDS), Specialized Datalinks, Integrated Tactical Communications Systems, Mission Optimization Software.

Capabilities: Ultra Intelligence & Communications (Ultra I&C), based in Montreal, specializes in tactical communications and ISR-enabling technologies. Its ORION radio systems and SATCOM solutions support ISR data transmission in satellite-denied environments. Ultra I&C is a key partner in Canada's TIC3 program, enhancing air defense and situational awareness through Link-16 and RAP capabilities.

ultra-ic.com

Headquarters and Locations Across Canada: Montreal, QC (HQ); Dartmouth, NS.

Vosker

Products: Autonomous cellular surveillance cameras; solar-powered remote monitoring systems; AI-enabled motion detection and alerting; secure cloud-based image transmission and management platform.

Capabilities: Vosker specializes in rugged, autonomous surveillance solutions designed for persistent monitoring in remote, off-grid, and harsh environments. Its cellular-enabled cameras provide real-time visual intelligence without requiring fixed infrastructure, making them well-suited for border security, base and perimeter protection, critical infrastructure monitoring, and remote site surveillance. Vosker systems combine long-endurance power management, solar charging, LTE connectivity, and AI-driven detection to deliver unattended ground sensor–like capability for situational awareness and threat detection.

Headquarters: Victoriaville, QC

Cybersecurity & Information Systems

Encryption & Secure Communications

Blackberry

BlackBerry

Secure Communications

Products: BlackBerry | Secure Communications, BlackBerry® AtHoc®, SecuSUITE®, BlackBerry UEM.

Capabilities: BlackBerry Secure Communications offers government clients a secure, sovereign communications platform tailored for Aerospace, Defense, and Security needs. Key solutions include BlackBerry® AtHoc® for crisis communication and incident management, SecuSUITE® for encrypted voice and messaging, and BlackBerry UEM for unified endpoint management. These tools ensure mission-critical resilience, data sovereignty, and compliance with the highest security standards.

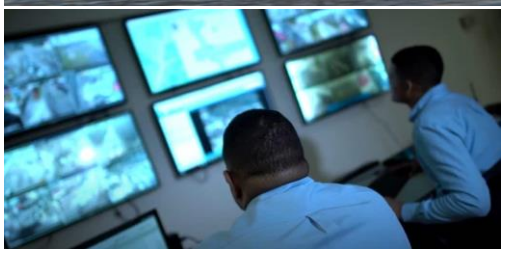

blackberry.com

Headquarters and Locations Across Canada: Waterloo, ON (HQ); Ottawa, ON; Vancouver, BC

GDMS Canada

GENERAL DYNAMICS
Mission Systems–Canada

Products: DIGITALspine™, ENVOY RPAS, Anti-Submarine Warfare Systems, Mission Management Systems, Tactical Communications, Cyber Defense, CitySHIELD Public Safety Platform

Capabilities: GDMS-C is a leading defense electronics and systems integration company, delivering mission-critical solutions across land, air, sea, space, and cyber domains. Its DIGITALspine™ architecture enables integrated C5ISR capabilities for the Canadian Army and NATO allies, enhancing connectivity and decision-making. GDMS-C also provides airborne mission systems, RPAS platforms like ENVOY, and sonobuoy processors for surveillance and anti-submarine warfare. Its CitySHIELD public safety platform has been deployed internationally.

gdmissionsystems.ca

Headquarters and Locations Across Canada: Ottawa, ON (HQ); Halifax, NS; Calgary, AB; Sherbrooke, QC.

Defence & Security Services

Military Infrastructure

AtkinsRéalis

Products: Aerospace, Defense, and Cybersecurity

Capabilities: AtkinsRéalis delivers platform-agnostic engineering, cybersecurity, logistics, and digital solutions across land, air, sea, space, and cyber domains. They support DND, DOD, and MOD with secure infrastructure, digital twins, and lifecycle systems, enhancing operational resilience, modernization, and mission success from concept through to decommissioning.

atkinsrealis.com

Headquarters and Locations Across Canada: Montreal, QC (HQ); Quebec City, QC; St. John's NFLD; Halifax, NS; Ottawa, ON; GTA, ON; Calgary, AB; Winnipeg, MB; Edmonton, AB; Fort McMurry, AB; Saskatoon, SK; Vancouver, BC; Burnaby, BC; Port Moody, BC; Kamloops, BC.

BluMetric

Products: BluPure Mission Ready Water Systems: Clean Water & Wastewater, CBRN protection, scalable, rapidly deployable.

Capabilities: BluMetric provides mobile and fixed water purification, desalination, and wastewater systems for defence, security, humanitarian relief, and remote communities. It offers advanced, ruggedized systems that meet the needs of their partners seeking a comprehensive solution for “Mission Ready Water.”

blumetric.ca

Headquarters and Locations Across Canada: Ottawa, ON (HQ); Yellowknife, NT; Sudbury, ON; Kitchener, ON; Toronto, ON; Kingston, ON; Montréal, QC; Dartmouth, NS

EXP

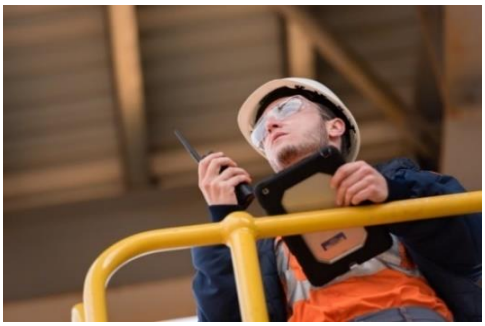

Products: Consulting, engineering, architectural, design, and environmental services.

Capabilities: EXP has extensive experience in delivering projects of all sizes for the federal government (PWGSC, CDC, etc.) as well as for the aerospace market, having completed more than 600 projects over the past 45 years for Bombardier Aerospace, Bombardier Transportation, and Airbus.

exp.com

Headquarters and Locations Across Canada: Brampton, ON (HQ) and 50 sites across Canada

Hatch

Products: Hatch defence capabilities.

Capabilities: Hatch delivers mission-critical energy and infrastructure solutions for defence across sovereignty, aerospace, maritime, joint, and R&D domains. From SMRs and microgrids to airstrips, hangars, and smart ports, they support remote and forward operating bases with resilient support systems, distributed energy sources, renewable power solutions, and infrastructure that ensures readiness.

hatch.com

Headquarters and Locations Across Canada: Mississauga, ON (HQ); Sudbury ON, Montréal QC, Calgary AB, Niagara Falls ON, Saskatoon SK, Winnipeg MB, Vancouver BC, Halifax NS, St. John's NL, Thunder Bay ON.

Marshall Land Systems

Products: Deployable and Mission Critical Infrastructure, Integrated Platform Solutions, Managed Support Services

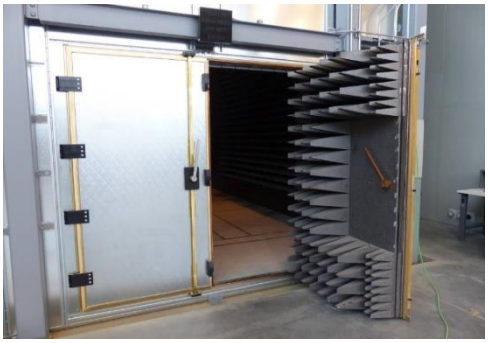

Capabilities: Marshall Land Systems Canada delivers integrated sustainment, engineering, and fleet modernization solutions for military and government customers. Drawing on Marshall's global defence expertise, the Canadian team supports armored vehicles, logistics platforms, and mission systems across land domains, providing through-life support, upgrades, training, and responsive in-country services with partners worldwide and Canadian industrial participation commitments nationally.

marshalllandsystems.com

Headquarters: Ottawa, ON and facility in Moncton, NB.

RaymondEMC

Products: QuietShield, QuietChamber, QuietShelter, QuietTech.

Capabilities: Specializing in the engineering, design, fabrication, installation, and testing of custom radio frequency (RF) shielded enclosures and anechoic chambers for military, government, automotive, high-tech, medical, and industrial applications. Raymond EMC prides itself on being an industry leader in product quality, performance, and innovation while providing unmatched client care and product support.

raymondemc.com

Headquarters: Ottawa, ON.

Rockford Engineering Works

Products: Turnkey engineered-to-order heavy equipment and industrial systems; defence manufacturing and sustainment equipment

Capabilities: Rockford Engineering Works Ltd. is a Canadian defence-enabling industrial engineering and manufacturing firm specializing in mission-critical infrastructure and production systems for defence, aerospace, and security applications. Rockford delivers end-to-end turnkey solutions, combining in-house mechanical, fluid power, electrical, automation, and advanced simulation engineering with fabrication, assembly, testing, installation, and long-term sustainment.

rockfordworks.com

Headquarters and Locations Across Canada: Regina, SK (HQ); Saskatoon, SK.

Training & Simulation

CAE

Products: Training & Simulation Systems, Mission Support Solutions, Synthetic Environment Platforms, Multi-Domain Operations (MDO) Solutions, Cybersecurity Training, Systems Engineering & Analytics.

Capabilities: CAE is a global leader in digitally immersive training and mission support solutions for defense and security forces operating in complex, high-stakes environments. With over 75 years of experience, CAE delivers integrated solutions across air, land, maritime, space, and cyber domains. Its offerings include advanced simulation systems, synthetic environments for multi-domain operations, and mission-critical analytics. CAE supports over 120 sites globally and serves more than 60 countries, helping defense customers achieve and maintain the highest levels of operational readiness.

International Test Pilot School

Products: Test pilot & tactical fighter training for allied air forces using crewed & uncrewed systems.

Capabilities: ITPS Canada comprises the International Test Pilots School (ITPS) and International Tactical Training Centre (ITTC). ITPS offers flight test training to civil industry and allied air arms. ITTC provides fast jet tactical training (Fighter Lead-In Training and Fighter Weapons Instructor Courses) to NATO, Five Eyes, and allied air arms. They collaborate with industry partners to develop and implement cutting-edge, cost-effective aviation training and simulation technologies.

Small Arms & Ammunition

Armament Technology

Products: Military-grade combat optics and fire-control accessories including ELCAN Specter® optical sights, SAI Optics, Tangent Theta precision rifle optics, and Tenebraex optical protection systems.

Capabilities: Best known as the original manufacturer and prime technical authority for ELCAN Specter® combat optics, Armament delivers ruggedized, battle-proven solutions that enhance soldier lethality, accuracy, and situational awareness across dismounted and mounted operations. Armament's optics are fielded by the Canadian Armed Forces, NATO allies, Special Operations Forces, and partner militaries worldwide.

GDOTS Canada

GENERAL DYNAMICS
Produits de défense et Systèmes tactiques–Canada
Ordnance and Tactical Systems–Canada

Products: Ammunition 5.56mm to 155mm, energetic single and multi-base propellant fabrication and development, pyrotechnics, explosive loading, brass cases, Simunition®.

Capabilities: General Dynamics Ordnance and Tactical Systems – Canada's expertise spans a broad range of defense products. Small, medium and large caliber ammunition, pyrotechnics, propellants, brass and metal parts are all part of GDOTS Canada's portfolio. Its Valleyfield site specializes in the development and manufacture of sophisticated and advanced energetic materials for the military. The Valleyfield site produces single- and multi-base propellants and can tailor energetics to applications for all weapon calibers ranging from infantry weapons to heavy artillery.

GDOTS Canada's Saint-Augustin site produces brass cases and metal parts. This facility is one of only a few producers of large-caliber brass cartridge cases in North America. Its Repentigny site LAP plant manufactures approximately 150 different military products ranging from 5.56mm small caliber ammunition to 155mm large caliber ammunition. The company's facilities include explosive melt pour processing and digital x-ray inspection capabilities as well as: propelling charges, percussion and electric primers, titanium dioxide liners, and tracers.

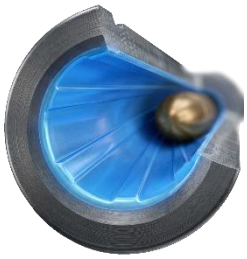

GDOTS Canada also manufactures the Simunition® training ammunition system, which is the most encompassing and realistic close-range training system in the world, comprising training rounds, weapon conversion kits and personal protective equipment.

Paradigm Shift

Products: EPVD® Advanced Gun Barrel Coating Technology

Capabilities: EPVD® brings the world-renowned PVD technology inside of gun barrels, tubular components and non-line of site. Covering internal diameters from 5.56mm to 155mm. EPVD® exponentially improves performance, delivering extended barrel life, extreme erosion resistance, delayed cook-off, superior muzzle velocity consistency, and better accuracy while being a 100% environmentally friendly chrome plating alternative.

Kamik

Products: Cold-Weather and Protective Footwear Systems

Capabilities: Kamik is Canada's largest domestic footwear manufacturer, with 125 years of protective, industrial and cold-weather footwear behind us. Today, that capability serves defence and security: military boots, cold-weather systems and protective footwear. Design, prototyping, testing and production happen in-house. Compound to finished boot. Capacity runs to millions of pairs annually, with international supply experience for government customers.

Weatherhaven

Products: Modular soft-walled shelters, expandable containers, and turnkey camps designed for extreme climates and remote environments with integrated life-support features such as HVAC, power generation, water distribution, and blackout capabilities.

Capabilities: Weatherhaven has supported military operations in 90 countries with redeployable infrastructure solutions, specializing in rapidly deployable shelters and containerized systems for defense, peacekeeping, and emergency response missions. Weatherhaven's solutions are used by NATO forces, the Canadian Armed Forces, and other allied militaries for command posts, medical clinics, aircrew training, and tactical operations. The TRECC™ system, for example, can be deployed by two personnel in under three minutes and is optimized for expeditionary missions requiring mobility and stealth.
